cerbyl

-Learning, unified

A

THE PROBLEM

- Students rely on multiple disconnected study tools
- Notes, flashcards, tutoring, and quizzes exist in silos.
- No shared context/learning memory
- Learning becomes manual, shallow, and non-adaptive
- Motivation, effort does not compound and long-term retention suffer

THE OPPORTUNITY

01- Market size*

Online education market forecasted to grow from $61B (2024) to $454B by 2033

02

CAGR of 25% during the forecast period (2026–2033)

03

Most learning tools still feel not unified, inefficient.

04

Students need analysis and not only the answers

THE SOLUTION

- A single, unified learning platform
- Notes, flashcards, AI tutoring, and quizzes connected
- Built-in progress tracking and gamification
- Learning works as one system, not separate tools

HOW IT WORKS

Every interaction counts toward your learning goals

Identifies weaknesses and reinforces tricky topics using spaced repetition

AI adapts difficulty and depth automatically for future suggestions

Learners use our tools like they use current apps but now, every action feels like real progress, not just another tool.

THE MAGIC

- One subscription replaces multiple tools
- No app switching
- Clear progress tracking is proven to fuel motivation
- Every interaction updates your learning profile
- Feels like a personal tutor, not a chatbot
